

**Proposals on Product Development towards Combating COVID 19 Outbreak  
An Initiative from IIT Kharagpur**

**Category: Treatment: Pharmacological, Non-Pharmacological**

**Title:** Telemedicine for fighting viral pandemic such as COVID-19

**Expected Outcome:** The software will be developed as specialized modules of an existing telemedicine system iMediX. This will make the prototyping fast. Specialized apps will also be developed for interacting with the system from mobile phones. Already a student has been engaged for prototyping home care modules of the system.

**Expected Timeline:** 2 years.

**Remarks:** Funding required for Rs. 60.0 Lakh

**PI Details:** Prof. Jayanta Mukhopadhyay, jay@cse.iitkgp.ac.in
